Many things have changed in Ukraine since 1990s, but not the unbelievable number of sexy and beautiful [Ukrainian women](#) here. It is not exaggeration!! If you routinely come across foreigners who are here for their first visit and when you can get their attention (which is difficult to do when there is a sexy bombshell walking by every 20-30 seconds) the most common comment you get is something like "Before coming to Ukraine I read about the beautiful girls here, but not in my wildest imagination could I have believed it could be a paradise like this. The guys back home are never going to believe me.". So come and visit Ukraine .. but don't forget your neck ointment, you are going to need it!

Ukrainian ladies are really very feminine and take care of themselves physically. They have a hardwired desire to look stunning every day. That's why you will often see Ukrainian girls in high heels and mini-skirts even in a cold weather. They use make up very professionally.

Ukrainian women are really unique and these days more and more men from over the world marry women from Russia and Ukraine. The differences in culture make relationship interesting. It is so exciting to learn about each other's traditions and mix cultures.

One fact was always strange to me... Eastern European women are often called Russian women. This turns really strange because more than 70% of what is referred to Russian ladies are actually living in Ukraine, mostly cities of Kiev, Odessa and Nikolaev. Probably a heritage of Soviet era.

Check my experience of dating Ukrainian women here. To have a flavour of what I am talking about you may also want to browse online directory of extremely hot Ukrainian ladies. The site offers the fastest and safest way to find companionship with beautiful ladies from this county.
