If you're looking for the best way to gain muscle, then you've come to the right place. The best way to gain muscle is not a magic bullet or a TV product or supplements such as muscle milk. Once you pack on muscles and transform your body, you'll be surprised at how easy it is. I searched all over for the best way to gain muscle and tried countless gimmicks that all failed to work or worked but didn't last. I literally gained over pounds of pure muscle mass in just a few short months with the [Chris Evans Workout](#).

When you are exercising with goals to lose weight and build lean muscle, you must do aerobic and anaerobic exercising. When you are performing cardio exercises, your body taps into your fat stores for energy, thus burning fat. However, if you do too much cardio, your body will then begin to take a detour to your muscle for energy, thus losing muscle along with fat!

The [Chris Evans Workout](#) is only half of the battle when building muscle. However without protein stores and the proper diet, your body will not have any building blocks to make this possible.

Your diet plan for the Chris Evans Workout for gaining muscle is more important than anything you do in the gym. By eating the right foods at the right time, you maximize your potential to grow your muscle fibers bigger, stronger, and leaner.

A common mistake that people add to their own diet plan for gaining muscle is that they will add protein shakes. You don't need protein shakes to build muscle. What many people do is take too much protein and calories and gain fat, not muscle. It's the vitamins and minerals that are required for building muscle. Don't in the "magic bullet" muscle building shakes and other absolute CRAP on the market.

Building muscle is not about going to the gym and pumping iron. How to build lean muscle requires a 3 pronged approach, with actually building muscle through weight training as only one part. In this article, we will cover the three legged stool to building muscle, plus methods to build muscle without weights, which is an excellent way of build lean muscle without ever having to getting a health club membership.

The three step approach aka the [Chris Evans Workout](#) on how to build lean muscle involves diet, aerobic training, and strength training. One without the other two will not build lean muscle that is our goal. First, eating smaller meals more is a better approach to building muscle than eating two or three large meals a day. Just remember to eat smaller portions so your overall caloric intake does not increase. What you eat, and don't eat, will also be a vital part in how to build lean muscle mass. Avoiding refined and processed carbohydrates and drinking as much water as you possibly can is the diet that will lead to building muscle.
