Treat shingles with Acyclovir now!

Shingles (Herpes zoster) causes:

- painful blisters on a marked area on one side of the body.
- possible blindness if it occurs in the face.
- a scar that can burn badly.

Does your clinic have Acyclovir?

All this can be prevented if shingles is treated quickly with Acyclovir!

Most government clinics do not provide Acyclovir.
Let's campaign for it!.

Support voluntary HIV counselling and testing. There are direct benefits if you know your HIV status. There are medicines that improve your health.

Always practise safer sex and use condoms.

If you have both TB and HIV Cotrimoxazole must be added to the TB treatment.

Cotrimoxazole added to TB treatment reduces the need of hospitalisation. It also reduces the chance of people dying while on TB treatment by half.

Cotrimoxazole is also called Cozole, Purbac, Nucotrim, Bactrim etc.

Fluconazole treats thrush in mouth, foodpipe and vagina and cryptococcal meningitis.

Chest pain when swallowing.
Oesophageal thrush?

Severe headache.
Cryptococcal
meningitis?

These illnesses are common in people with HIV. Fluconazole should be available since activists exposed unfair company profits.

The foodpipe is also called the oesophagus.

Drop can be treated with antibiotics. Condoms prevent STDs.

+

Doxycycline twice a day for a week

All government clinics should provide STD treatments.

If STDs are not treated properly, they spread HIV.

Many private doctors do not give Ciprofloxacin to save money.

Acyclovir can treat Herpes.

Herpes is a common STD. Untreated Herpes helps spread HIV. Clinics do not have Acyclovir.

For a person living with HIV Cotrimoxazole can be life saving!

Cotrimoxazole is also called Bactrim, Purbac, Cozole, Nucotrim... Each company gives it a different name.

> Have you tested **HIV** positive? You might need Cotrimoxazole.

This medicine can prevent PCP pneumonia, Toxoplasmosis stroke, nesses common with

Ensure a constant supply of Cotrimoxazole at your clinic!
