

TAC TB Infection Control Survey – March 2018
Summary of results of national infection control survey

This table shows the number of “no” answers per question.

Province	Is there enough room in the waiting area for everyone?	Are you seen within 30 minutes?	Are the windows in the facility open?	Are there posters telling you to cover your mouth when coughing or sneezing?	Are people in the facility waiting area asked if they have TB symptoms?	Are people who are coughing separated from those who are not?	Are people who are coughing a lot or may have TB given TB masks or tissues?	RANK
